

## Job Description

<b>Job Title</b>	Product Owner
<b>Department</b>	Systems
<b>Reports to</b>	Head of Systems
<b>Responsible for</b>	N/A

## Job Purpose

To own the strategy for our state-of-the art Internet of Things (IoT) monitoring solution and deliver the backlog as the business grows.

## Duties and responsibilities

### Operational responsibilities

- Serve as the voice of the client
- Work with internal and external customers to analyse the needs and align product roadmap to strategic goals
- Own the product roadmap
- Develop scope and define backlog items (epics/features/user stories) that guide the Agile software development team
- Solve product-related problems, make decisions, complete trade-off analysis to stay on track towards business deliverable commitments
- Draft key objectives and results, strategies and apply the data for the product to make business decisions
- Collaborate with stakeholders during the visioning and concept development of a product
- Accountable for the created product(s), delivering in the product model and communicating the product needs with business partners
- Assess value, develop cases, and prioritise stories, epics and themes to ensure work focuses on those with a maximum value that are aligned with product strategy
- Identify and help the client understand the business model, value and value proposition
- Develop and maintain an appropriately prioritised backlog of user stories for implementation
- Act as an ambassador for the product internally and externally and as the primary contact for queries related to the product
- Develop appropriately detailed specifications for the product features so they are clearly understood by the development teams
- A customer advocate and leader within the team
- Represent the team in front of stakeholders, clients or users

- Work closely with software engineers and senior management in order to create a product that fits the company portfolio
- Research and analyse market, the users, and the roadmap for the product
- Follow our competitors and the industry
- Increase team understanding of Agile practices, new technologies opportunities and other new trends.

### **Peer group / cross team liaison**

- Maintain a strong and open working relationship with colleagues and peers, reflecting Bennamann values

### **Reporting and communication**

- Organise and deliver effective user workshops and advisory groups
- Run Sprint Planning, refinement and other ceremonies with the software engineering team
- Communicate roadmaps and progress throughout the business

### **Team**

- Proactive member of motivated and engaging team
- Participate actively in team meetings and proactive in own review and development
- Supportive member of the Systems team, role modelling Bennamann values in both internal and external relationships

### **H&S**

- Responsible for own H&S and that of your direct reports, adhering to company guidelines be this in an office / workshop setting, on site, in a vehicle and / or any other reasonable context
- Highlight any H&S risks you identify to management
- Ensure you have any and all reasonable PPE and highlight any deficiencies to management who will address as required
